# \$825K SETTLEMENT: ILLUSTRATING FACIAL FRACTURES, SURGERY AFTER TIRE EXPLOSION

Kenneth Kolpan, Esq., Law Offices of Kenneth I. Kolpan, PC, Boston, MA

June 23, 2020

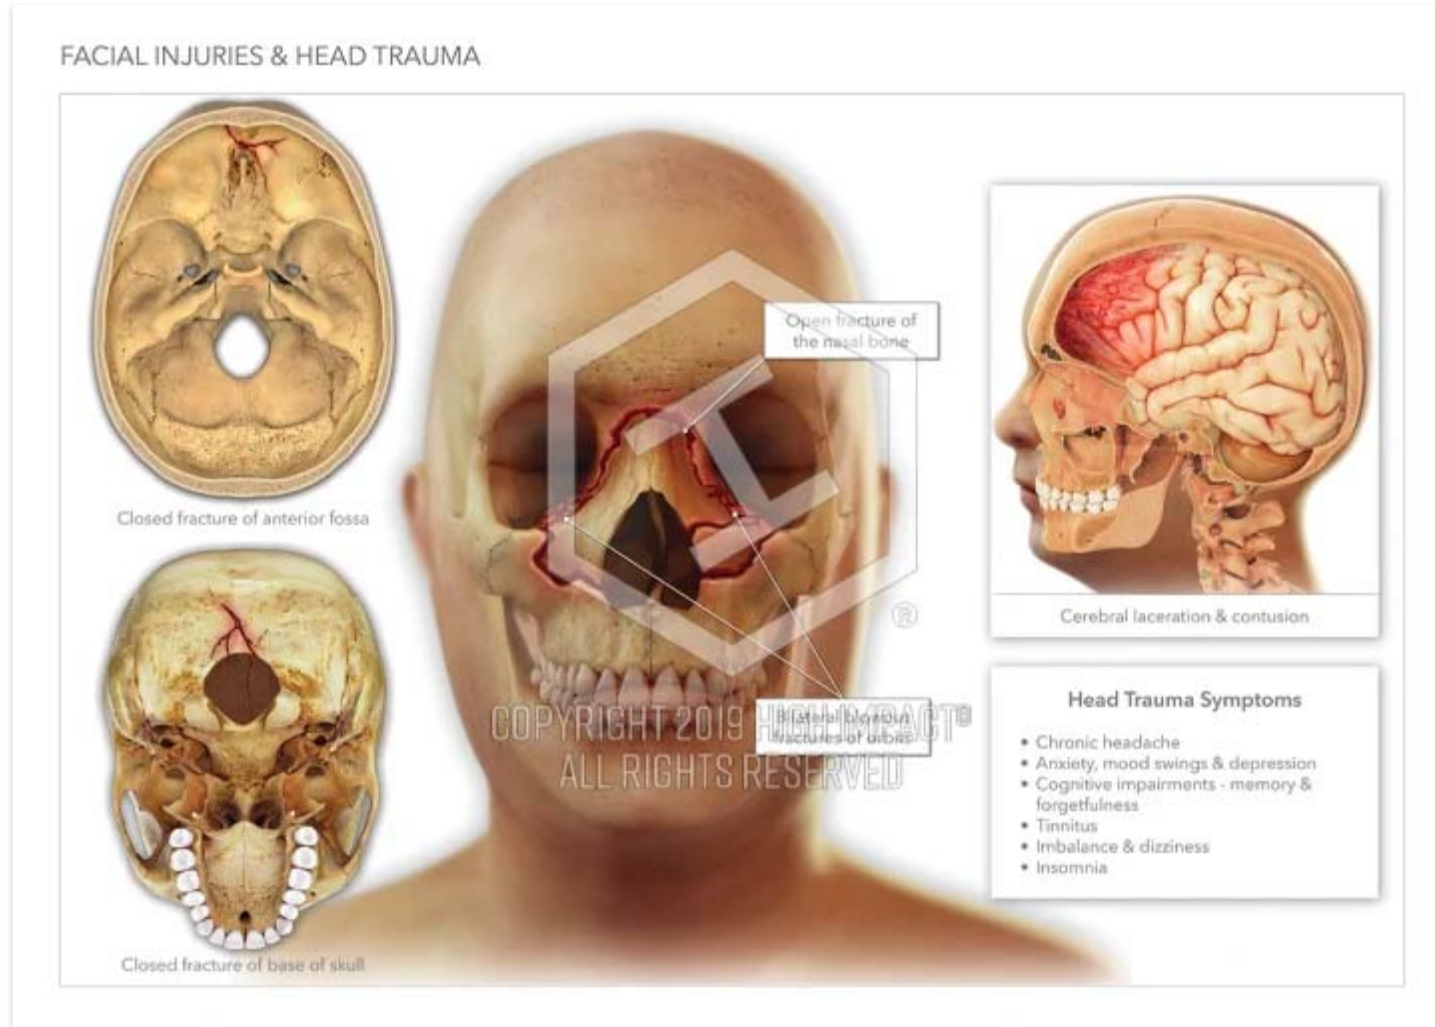

Kenneth Kolpan, Esq., obtained an \$825K settlement for an autoworker who was struck in the face with a tire and rim after an overinflated tire tube exploded. The victim suffered catastrophic facial fractures and traumatic brain injury that would require extensive surgery.

## CHALLENGE

The injury could have been avoided had the machine manufacturer required (instead of making optional) the use of a device that would have prevented an exploding tire and rim from being ejected off the machine. Furthermore, the franchisee that sold the machine to the Plaintiff's employer did not offer the protective device that would have prevented the injury.
